US-10-209-767-984/C

Sequence 984, Application US/10209787

Sequence 984, Application US/10209787

Publication No. US20030217377A1

GENERAL INFORMATION:

APPLICANT: Kince, Fire B.

APPLICANT: Rice, Michael C.

TITLE OF INVENTION: Stranded Oligonuclectides

TITLE OF INVENTION: Stranded Oligonuclectides

FILE REFERENCE: Napro-4

CURRENT APPLICATION NUMBER: US/10/209,787

CURRENT PILING DATE: 2000-03-27

PRIOR APPLICATION NUMBER: US 60/192,176

PRIOR APPLICATION NUMBER: US 60/192,176

PRIOR PILING DATE: 2000-03-27

PRIOR PILING DATE: 2000-03-27

PRIOR PILING DATE: 2000-06-01

NUMBER OF SEQ ID NOS: 4386

SOFTWARE: Friedman macro Napro4

US-10-230-006-759/c

Sequence 759, Application US/10230006

Sequence 759, Application US/10230006

Publication No. US20030191077A1

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Rosnaugh, Kathy

APPLICANT: McSwiggen, Jim

TITLE OF INVENTION: METHOD AND REAGENT FOR THE TREATMENT OF ASTHMA AND ALLERGIC CONDI

FILE REFERENCE: 400/056 (MBHB01-1110)

CURRENT APPLICATION NUMBER: US 60/315,3006

CURRENT FILING DATE: 2001-08-28

NUMBER OF SEQ ID NOS: 2678

SOFTWARE: Patentin version 3.0

SEQ ID NO 759

US-10-225-023-196

Squence 196, Application US/10225023

Publication No. US20030175950A1

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
TITLE OF INVENTION: RNA Interference Mediated Inhibition of HIV Gene Expression Using TITLE OF INVENTION: Interfering RNA
FILE REPRENCE: 400/054 (MBHB01-665-B)
CURRENT APPLICATION NUMBER: US 60/398,036

PRIOR PILING DATE: 2003-01-06
PRIOR PRILING DATE: 2002-05-29
PRIOR PILING DATE: 2002-05-29
PRIOR PILING DATE: 2002-05-29
PRIOR PILING DATE: 2002-05-29
NUMBER OF SEQ ID NOS: 1494
SSOFWARE: Patentin version 3.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 792

US-10-209-787-3714/c

I SQUENCE 3714, Application US/10209787

Publication No. US2003021737A1

GENERAL INVORMATION

APPLICANT: Waiec, Howard B.

APPLICANT: Raice, Midhael C.

I TITLE OF INVENTION: Stranded Oligonucleotides

FILE REPRENCE: Napro-4

CURRENT FILING DATE: 2002-07-30

PRIOR APPLICATION NUMBER: US/10/209, 787

CURRENT FILING DATE: 2001-03-27

PRIOR APPLICATION NUMBER: US 60/192,176

Sequence 40, Application US/09764420A

Patent No. US20020115072AI

GENERAL INFORMATION:
APPLICANT: Chamoto, No. US20020115072Aluko
APPLICANT: Yamamoto, No. Deceting Target Substrate, Probe Array, Method Of
TITLE OF INVENTION: Manufacturing Same, Probe Array, Method Of
TITLE OF INVENTION: Specifying Nucleotide Sequence Of Single-
TITLE OF INVENTION: Stranded Nucleic Acid In Sample, And
TITLE OF INVENTION: Quantitative Determination Of Target Substance
TITLE OF INVENTION: Dample
TITLE REFERENCE: 35C.1528
CURRENT APPLICATION NUMBER: US/09/764,420A

CURRENT FILING DATE: 2001-01-19
NUMBER OF SEQ ID NOS: 65
LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö

LOCATION: (11)...(13)
OTHER INFORMATION: Conjugated to biotin molety.
NAME/KEY: misc_feature
LOCATION: (0)...(0)
OTHER INFORMATION: Has phosphorothioate and phosphodiester chimeric
OTHER INFORMATION: backbone with phosphodiester on 3' end.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 13, Application US/10371600

Sequence 839, Application US/10112653

PUBLIcation No. US20030050268A1

GENERAL INFORMATION:
APPLICANT: Krieg, Arthur M.
APPLICANT: Berg, Daniel J.
TITLE OF INVENTION: IMMUNOSTIMULATORY NUCLEIC ACID FOR
TITLE OF INVENTION: TRATMENT OF NON-ALLERGIC INFLAMMATORY DISEASES
FILE REFERENCE: C01039/70060(AMS);
CURRENT APPLICATION NUMBER: US 80/10/112,653

CURRENT TILING DATE: 2002-03-29

PRIOR APPLICATION NUMBER: US 60/279,642

PRIOR FILING DATE: 2001-03-29

NUMBER OF SEQ ID NOS: 1040

SOFTWARE: FastSEQ for Windows Version 3.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      FEATURE:
CTHER INFORMATION: Synthetic Oligonucleotide
NAME/KEY: misc feature
LOCATION: (13)
COLATION: (13)
Floate INFORMATION: fluorescein isothiocyanate conjugate
US-10-112-653-839
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                TYPE: DNA ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    TYPE: DNA ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1084 AAAAAAAAAA 1096

APPLICANT: Lodes, Michael J.

APPLICANT: Henderson, Robert A.

APPLICANT: Benson, Darin R.

APPLICANT: Secrist, Heather

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR

TITLE OF INVENTION: COMPOSITIONS AND DIAGNOSIS OF LUNG CANCER

FILE REPERENCE: 210121.475C10

CURRENT APPLICATION NUMBER: US/09/854,133

CURRENT FILING DATE: 2001-05-11

NUMBER OF SEQ ID NOS: 735

SEQ ID NO 47

LENGTH: 14
                                                                                                                                                                                                                                                                                                  US-US-1944-400-130/C

SEQUENCE 130, Application US/09924400

Patent No. US2002016531A1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     US-09-429-755-130/c

US-09-429-755-130/c

Sequence 130, Application US/09429755A

Patent No. US20020111467A1

GENERAL INFORMATION:

APPLICANT: Frudakis, Tony N.

APPLICANT: Retter, Tony N.

APPLICANT: Retter, Marc W.

APPLICANT: Retter, Marc W.

APPLICANT: Dillon, Davin C.

APPLICANT: Dillon, Davin C.

APPLICANT: Dillon, Davin C.

APPLICANT: Dillon, Davin C.

APPLICANT: BETTER THE TONE TREATMENT AND DIAGNOSIS OF BREAST CANCER

TILLE OF INVENTION: TREATMENT AND DIAGNOSIS OF BREAST CANCER

TILLE OF INVENTION: TREATMENT AND 1999-10-28

CURRENT APPLICATION NUMBER: US/09/429,755A

CURRENT FILING DATE: 1999-10-28

NUMBER OF SEQ ID NOS: 315

SOFTWARE: FastSEQ for Windows Version 3.0

SEQ ID NO 130

Sequence 1245, Application US/09274553D

Sequence 1245, Application US/09274553D

Patent No. US2002008225A1

GENERAL INFORMATION:
PAPLICANT: Blatt, Lawrence

APPLICANT: Blatt, Lawrence

APPLICANT: McGwiggen, James

APPLICANT: McCoberts, Beth

APPLICANT: Pavco, Pamela

ITILE OF INVENTION: NOTZYMATIC NUCLBIC ACID TREATMENT OF DISEASES OR CONDITIONS RELAN

ITILE OF INVENTION: UNMER: US/09/274,553D

CURRENT PILING DATE: 1999-03-23

PRIOR FILING DATE: 1999-03-24

PRIOR FILING DATE: 1998-04-27

PRIOR FILING DATE: 1998-04-27

NUMBER OF SEQ ID NOS: 3148

SOFTWARE: Patentin version 3.0

SEQ ID NO 1245

LENGTH: LAWRENCE OF SEQ ID NOS: 3148

SOFTWARE: Patentin version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 59, Application US/09263959

Publication No. US20030166026A1
GENERAL INFORMATION:
APPLICANT: Lynx Therapeutics, Inc.
APPLICANT: Bowen, Laurie J
APPLICANT: Bowen, Benjamin A
TITLE OF INVENTION: Indentification of Specific Biomarkers for Breast Cancer Cells
FILE REFERENCE: 37-000110US
CURRENT APPLICATION NUMBER: US/10/339,782
CURRENT PILING DATE: 2003-01-08
NUMBER OF SEQ ID NOS: 495
SOFTWARE: Patentin version 3.1
APPLICANT: HANZEL, David K.
APPLICANT: CHEN, David R.
APPLICANT: CHEN, David R.
APPLICANT: CHEN, David R.
